Histort & Philosophy

Reliable Alluminium began as a general window fabricator in 2007. Over the years, the company has become window & door fabricator for high-rise condominiums, office buildings and hotels across Maharashtra and PANINDIA

Today, Reliable Alluminium taken on the role of one of the leading upvc window fabricator in Maharashtra for small to larg size projects.

Our objective is to provide our clients with an “I am assured” experience when we are chosen to execute their projects. Our emphasis on clear communication and follow through procedures ensures that client’ s objectives are top priority in the planning and execution of all our processes.

Our project management and execution philosophy is:

- create detail schedule and resources plan to meet client’ s project objective,
- communicate clearly with all project stakeholders,
- track project progress and fine tune deviations,
- supervise closely on quality of work done,
- complete and commission the project on time.

We take pride in our delivery, thus our clients can always be assured that only the most experienced and qualified people are serving them, all the time.

Our Vision

To be a respectable Window & Door fabricator delivering beyond expectation,always.

Our Mission

To procure projects at competitive pricing, and deliver quality work within reasonable time frame. Dealing honestly and fairly with our customers, suppliers, employees & government.

uPVC Profile Partner (AEL)

Leading the market with its eco-friendly revolution of uPVC profiles in India, Ökotech is a part of the Aparna Group, which holds a legacy of 28 years in real estate and more than 9 years of experience in window fabrication. Having to its credit of being India's fastest growing uPVC brand, Ökotech is backed by a superior German technology and state-of-the-art extrusion unit for a wide range of doors and windows including duct covers, ventilators and uniquely configured arch windows along with customised reinforcement that comply with European standards for uPVC profiles. The aim is to provide the best product range and offer uncompromised quality.

Giving skyscraper, villa, low-rise office
or residential complex the
ÖKOTECH uPVC profile advantage.

Every profile bearing the Aparna hallmark of quality.

- Vast 28 years' experience across Tiles, Steel Sections, Ready Mix Concrete, Building Lifestyle Gated Communities, Housing Infrastructure and Real Estate Development

Quality that lasts for more than 10 years.

- 6-8 PHR of TiO_2 ensures best color and exterior weatherability.
- 8-10 PHR of CaCO_3 improves mechanical properties.

Make wide variety of Windows and Doors.

- Wide range of profiles
- Upto 65% opening widths
- Pioneers in 7 feet to 10 feet doors

ÖKOTECH ADVANTAGES

Wide variety of Ökotech uPVC profiles facilitates the fabricators to make wide range of windows and doors that perform in diverse weather conditions. Following are its benefits:

Energy saving

3 times more effective at maintaining temperatures within a building

Water resistance

Leak proof and fully resistant to strong tropical rain

Salt water

The profiles are unaffected by saline water

Humidity

The profiles don't warp, rot or break down in hot and humid climates

Termite proof

Unaffected by termites in tropical climates unlike wooden frames

Security

The profiles have high wall thickness and multi-chambered designs which aids in the installation of multi-point high security locking systems

Pollution free

Ökotech profiles are lead free and meet the greenline norms as per European standards

Durability

Designed to last for lifetime, the profiles don't require painting and look as good as new for years

Easy Maintenance

Due to the nature of the materials used the frames are highly durable, keeping it rot, warp, corrode and 100% termite proof

Sunlight

The profiles control energy costs in buildings as the heat insulation is at least 2.2 times better than that in Aluminium profiles

Wind

Suited for seaside locations and for high-rise buildings, the profiles maintain their strength through fully reinforced galvanized steel inner frames

Noise reduction

The profiles are designed with a double-seal system that reduces noise by 30-40 dB

Fire resistance

The profiles are manufactured by meeting the DIN standards and are self-extinguishing – it doesn't allow fire to spread due to fire retardant used in the mix
